Foreword

The passing last year of our late president, William Emerson Marshall, co-founder of this firm with Alfred E. Wheeler, was keenly felt, not only by us but by the horticultural world in general. For his research in Lilies alone he was known as an ardent horticulturist throughout Europe as well as the United States and Canada.

During his lifetime he gathered around him a staff of keenly interested men who, during practically all of his business career, worked with him, and to whom, for the past few years, he gradually turned over his work. These men are capable now of "carrying on," and this they are prepared to do, giving you even better and more intelligent service after so many years of practical experience, thus maintaining our well established reputation as a reliable and responsible institution.

We aim to keep all our departments up-to-date. We include in our catalog those items that show merit over older but similar types, which are discarded.

We invite inquiries from those seeking advice on horticulture as we have in our establishment experts who are well qualified to impart information. It may be possible that there are many articles not enumerated in our comprehensive list, but as we have extensive sources of supply, an inquiry will bring the desired information and lowest quotation on high grade stock.

Information and Instructions

ORDER EARLY. We request our customers to order as early as possible on receipt of catalogue. We endeavor to ship all orders immediately on receipt, but during the busy season it is almost impossible; hence, the importance of ordering early.

Orders for Bulbs, Plants and Nursery Stock will be shipped in due time for planting in season.

PARCELS POST. We deliver free by Parcels Post all seeds, when cash accompanies the order, except Farm Seeds or Clovers. If these are wanted by mail, please add the cost of postage at zone rates.

Fertilizers, insecticides, sundries, trees and plants are, at all times, except as stated below, excluded from free delivery

No charge for delivery to railroad station, steamer or express office.

DELIVERY. We deliver free by Parcels Post, Express or Freight (at our option) all Fertilizers, Insecticides or Garden Sundries on all orders value \$3.00 or over, when cash accompanies the order, within a radius of 50 miles of New York City.

ESTATE SUPERINTENDENTS, GARDENERS AND FARMERS. Persons requiring the services of reliable men, married or single, should consult with us, as we have the names of a number on our register, thoroughly experienced in every branch of the business. There is no charge for this service.

TREES AND SHRUBS. We are not listing them in this catalog but will gladly quote prices on any quantity or variety. As we have an excellent source of supply we are in a position to give estimates on plantings where first class stock is wanted. By letting us estimate on your planting requirements you incur no obligation whatever.

PRICES. The prices published in this catalogue are subject to market changes without notice. Owing to the fluctuating market in prices of all materials, we cannot bind ourselves on prices of any articles.

PAYMENT. All orders should be accompanied by cash in the form of Draft, Cheque or P. O. Order. Owing to the difficulty in collecting accounts, no order from parties unknown to us or whose accounts remain unsettled will be attended to unless accompanied by remittance.

C. O. D. SHIPMENTS. We are always pleased to supply seeds to be paid for on delivery. Bulbs, Plants, Fertilizers, Insecticides and Perishable Stock will not be sent C. O. D. unless 50 per cent cash accompanies the order.

FALL BULB CATALOG

Our bulb catalog, containing a complete list of all bulbs for fall planting and greenhouse forcing, will be ready about July 1st. We also list plants for forcing and a complete line of perennial flower seeds for summer sowing; numerous illustrations.

LILIES. A complete list of over 100 varieties described and illustrated. (See page 62).

LOCATION OF OUR STORE
Our store, No. 150 West 23rd Street, is situated between Sixth and Seventh Avenues.

Marshall's Lawn Grass Seeds

Marshall's Lawn Grass Seeds have given universal satisfaction for the past 33 years and are used on many of the largest estates in every section of the country for making the best lawns. Our mixtures contain only the best grades of recleaned grasses blended in proportions to give quick and permanent results.

MARSHALL'S "Durogreen" LAWN GRASS

Marshall's Duragreen Lawn Grass Mixture (formerly called Special Lawn Grass) produces a perfect as well as permanent lawn of luxuriant richness. It quickly forms a closely interwoven, firm and elastic turf ready for cutting in about 6 weeks from time of sowing. Duragreen mixture is the result of years of experimenting and is composed of the proper proportions of fine-leaved, deep rooting, perennial grasses which will thrive under varied conditions of soil and climate; maintaining a succession

of growth during the different seasons of the year, thus insuring a rich, deep green, smooth and velvety lawn, free from clumps. This is a scientifically blended mixture, containing only the highest grade of recleaned seeds of Red Top, Kentucky Blue, Chewing's Fescue and Colonial Bent grasses, blended in proper quantities. Price: Lb. 60c, 5 lbs. \$2.50, 20 lbs. \$10.00, 100 lbs. \$50.00. Delivered transportation paid when cash accompanies the order

MARSHALL'S "Matchless" LAWN GRASS

Marshall's Matchless Lawn Grass Mixture (formerly called Central Park) still maintains a high place in the esteem of those who desire an even, dense growth of permanent sward very early in the season. This mixture contains no annual grasses so detrimental to a permanently good lawn. Only grasses of lasting value and extreme hardiness are used in this popular mixture and we exercise great care to use only the purest seed in the proper proportions in its blending. This mixture is recommended to those who desire a popular priced mixture for average conditions and requirements.

Our Matchless Lawn Mixture is prepared from our own formula and must not be confused with many mixtures that are sold under this name. It is composed of only the best recleaned seeds, containing Kentucky Blue, Fancy Red Top, Fescue, Perennial Rye and a small quantity of White Clover, all blended to warrant perfect results.

1 lb. will sow a plot 15x15 ft.; 5 lbs., 25x40 ft. (1,000 sq. ft.); 200 lbs., 1 acre (43,565 sq. ft.) Price: Lb. 45c, 5 lbs. \$2.15, 20 lbs. \$8.00, 100 lbs. \$40.00.

MARSHALL'S "SHADY PLACE" LAWN GRASS

Usually it is quite difficult to obtain a satisfactory growth of grass under trees and in shady places; for sowing in such places we recommend the use of this special mixture. It will quickly produce an abundant and even growth of beautiful green grass. The grasses

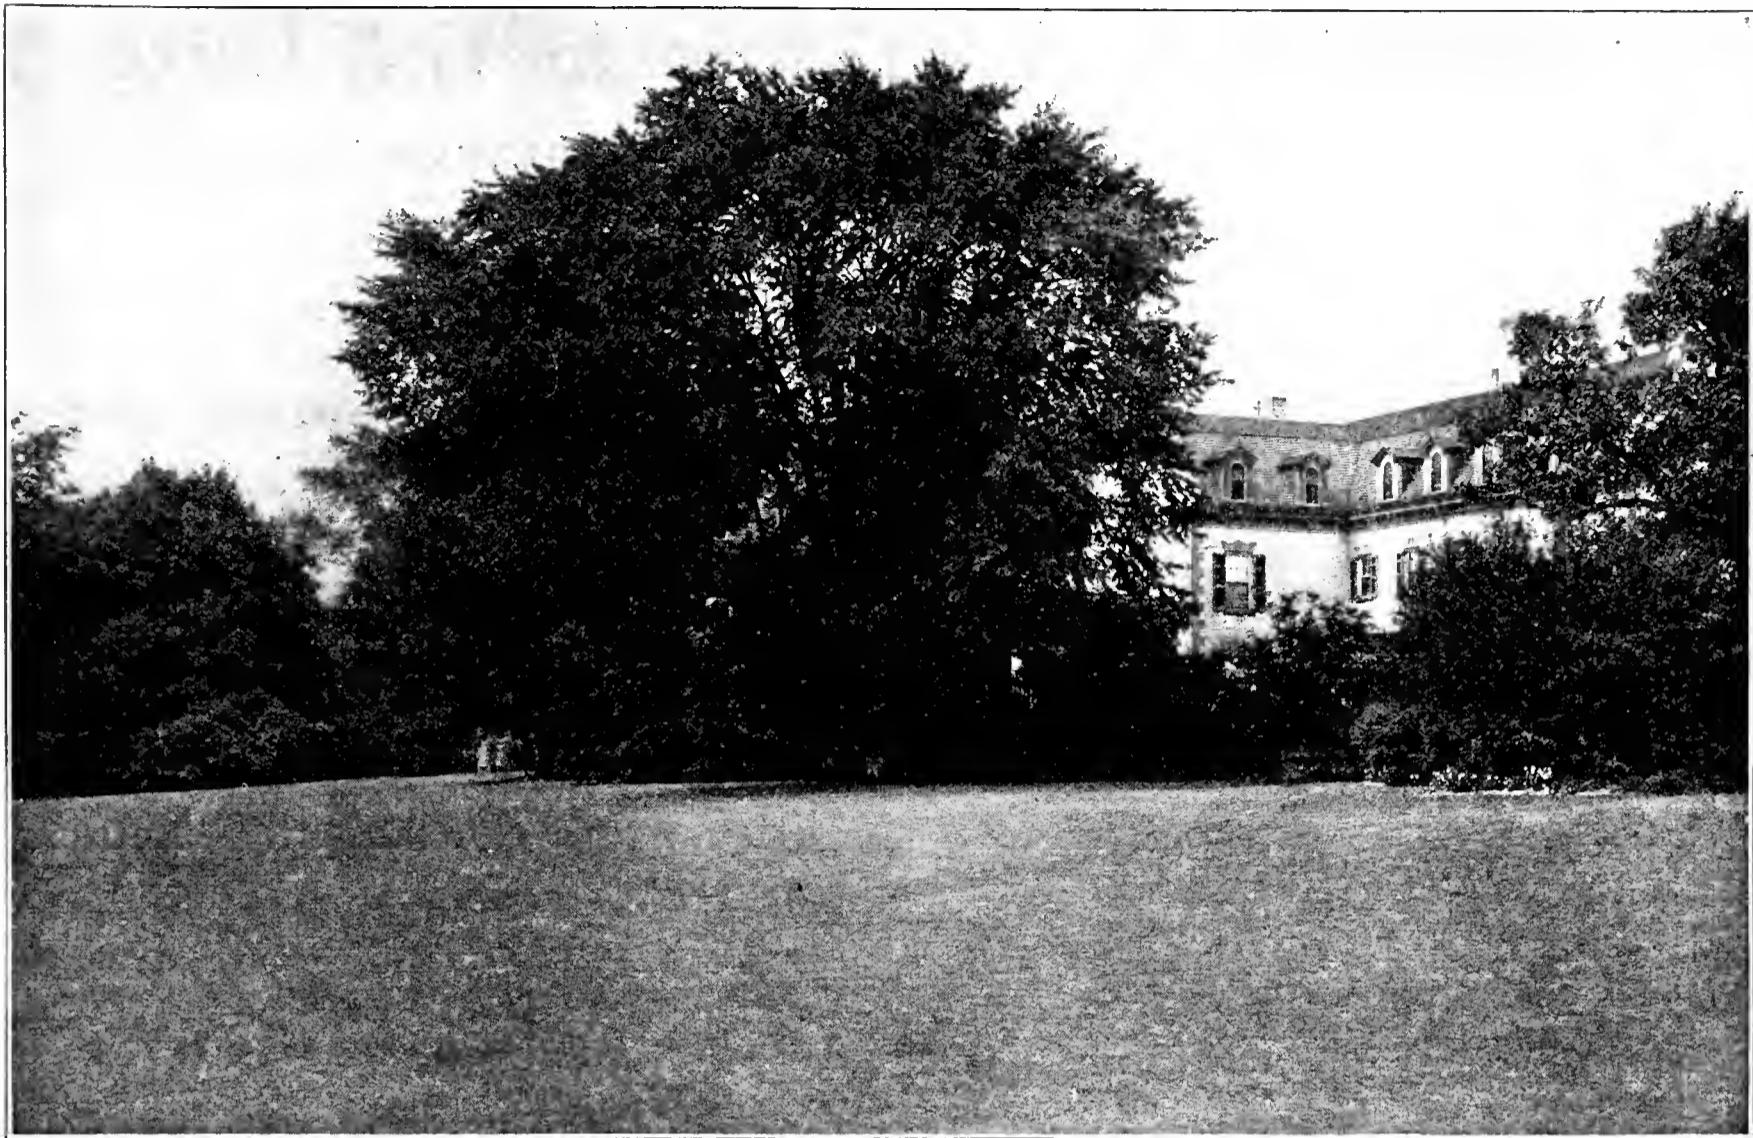

used in making this special mixture are only those adapted for growing in shade. It has been successfully used on some large operations where a green sward was desired on land partially shaded by old trees. Price: Lb. 60c, 5 lbs. \$3.00, bu. (20 lbs.) \$11.00, 100 lbs. \$55.00.

Delivered transportation prepaid when cash accompanies the order.

For best results use **Marshall's Lawn Dressing** for new and old lawns.

The Lawn. The latest and best knowledge on the making and up-keep of lawns. By L. S. Dickinson. \$1.25, Postpaid.

For Beetle Grubs in Lawns use 15 lbs. Magnesium Arsenate for each 1000 feet of space. Apply in September mixing it with sand.

**MARSHALL'S
ALL BENT FORMULA
LAWN GRASS**

For many years Bent Grasses have been used for Putting Greens with great popularity and recently many are using them for lawns with perfect results. Our mixture contains only Bent Grasses in variety. One pound will sow a plot 10x20 ft., 150 lbs. 1 acre. Price: Lb. \$1.70, 5 lbs. \$8.00, 20 lbs. \$30.00.

**MARSHALL'S
“TERRACE”
LAWN GRASS**

A special mixture of grasses for sowing on terraces and side hills—grasses that produce strong, spreading roots, thus preventing heavy rain from washing them out; that will withstand drought and exposure, thrive on shallow soils and produce a rich, green turf throughout the season. Price: Lb. 75c, 5 lbs. \$3.65, bu. (20 lbs.) \$14.00, 100 lbs. \$70.00.

**MARSHALL'S
CHEWING'S FESCUE
FORMULA
LAWN GRASS**

To procure an exceptionally fine lawn that will withstand drought and other adverse conditions, we recommend this mixture. It is composed of Chewing's Fescue, various Bents and a small proportion of Red Top. These grasses will give a wonderful dark green texture and combined with their spreading habit and thick growth will give a velvety appearance throughout the Summer and Fall. Price: Lb. 90c, 5 lbs. \$4.35, 20 lbs. \$17.00.

**SPECIAL LAWN GRASS MIXTURE FOR
SEASIDE LAWNS**

A mixture of fine grasses peculiarly suited to seaside lawns and very sandy soils. Price: Lb. 75c, 5 lbs. \$3.65, bu. (20 lbs.) \$14.00, 100 lbs. \$70.00.

SPECIAL LAWN GRASS FORMULAS

The following formulas are recommended by the New Jersey Experiment Station, New Brunswick, N.J., for lawns under various conditions.

Marshall's Grass Mixtures for Golf Links

MARSHALL'S "PUTTING GREEN," or "TENNIS COURT" MIXTURE

A very carefully prepared mixture for use on putting greens, croquet lawns, tennis courts, bowling greens and lawns. This mixture produces a very thick, soft growth; when sown on a well-prepared ground, and mowed short will allow a ball to roll in almost a direct line. We especially recommend this mixture to those who are particular to obtain the very best. Our mixture contains only the very fine-bladed species of grasses without Rye Grass. 25 lbs. will seed a putting green 75 feet square. **Price: 5 lbs. \$4.50, 20 lbs. \$16.00, 100 lbs. \$75.00.**

MARSHALL'S FAIR GREEN MIXTURE

Marshall's Fair Green Mixture is composed mainly of perennial native grasses and two very important European grasses which have proven of great value for Fair Green use. They are all of dwarf, spreading growth, forming a close velvety surface which improves from year to year if given proper care.

This mixture contains no Clover but will be added if desired in quantity of one-half pound per bushel of grass seed. Sow 150 lbs. per acre. **Price: 20 lbs. \$8.00, 100 lbs. \$40.00.**

MARSHALL'S POLO FIELD MIXTURE

This mixture is composed of deep rooting grasses that will form an enduring turf and stand the roughest usage. Sow at the rate of 150 to 200 lbs. per acre. **Price: 25 lbs. \$15.00, 100 lbs. \$60.00.**

Grass for Hay Crops and Pastures

Mixtures for Hay and Permanent Pastures

The results obtained from our special Grass Seed mixtures are well known by the constantly increasing demand for them. Fall seeding is preferable, but spring sowing will be successful if done early, while the land is cool and moist. In addition to the Grasses, we advise sowing 10 lbs. of Mixed Clover Seed per acre.

We recommend sowing 50 lbs. to the acre.

Permanent Pasture Mixture No. 1. For cool and light soils.

Permanent Pasture Mixture No. 2. For medium soils.

Permanent Pasture Mixture No. 3. For heavy soils.

Prices of any of the above Mixtures, 10 lbs. \$3.50, 100 lbs. \$30.00.

Marshall's Recleaned Grass Seeds

FOR LAWNS, FIELD AND OTHER PURPOSES

Many of the following grasses are used in Mixtures for Lawns and Pastures. The seeds we are offering show maximum purity and germination and are all of the highest quality procurable.

For anyone wishing mixtures of their own formula, we shall be pleased to ship the grasses separate or mix them to their own specifications.

Novelties and Specialties in Flower Seeds

AQUILEGIA CLEMATIFLORA, MIXED

This new spurless Aquilegia, which was obtained by a cross between Scott Elliott strain and the common single variety, we feel will be a useful addition to the varieties now offered.

This cross has been selected for eight years and the colors are all there with the exception of reds and scarlets. It is free flowering, having as many as fifteen flowers, measuring three inches across, on a plant. Per packet, 75c.

AQUILEGIA LONGISSIMA

The spurs on this variety are 5 inches or more in length and the effect is at once dainty, unusual and arresting. The flowers are of striking formation with deep yellow petals and paler yellow sepals. Bright green cut-leaved foliage and reddish stems. Per packet, 50c; 5 packets, \$2.00.

RUST-PROOF ANTIRRHINUM MAXIMUM

With the introduction of **rust-proof** strain of Antirrhinum which contains 75% of rust-proof plants we feel that their popularity, which has always been held back by rust, will increase and make Antirrhinums one of the most popular flowers in America. 2½ to 3 ft.

Alaska. Large pure white.

Compfire. A new color in Antirrhinums, being pure luminous scarlet.

Canary Bird. Canary-yellow, vigorous.

Copper Shades. An outstanding variety due to the range of shades present.

Crimson. A magnificent rust-proof type.

Fair Lady. A beautiful shade of silver-pink.

Loveliness. Pure soft rose-pink.

Rust-Proof Mixed. Contains a wonderful range of popular colors.

Named varieties, 35c per packet. Mixed, 25c per packet.

Rust-Proof nanum grandiflorum Mixed. Excellent for bedding. The color range, size of flower and habit are most remarkable. 18 inches. Packet, 25c.

BALSAM, DOUBLE BUSH FLOWERED, TORCH

Bush flowered Balsams are not at all well known in this country. Unlike the taller growing Balsams, the flowers in the little bush flowered type are carried at the tips of the stems, making a show of color rather than foliage. The variety Torch, penetrating vermillion-red in color, grows 8 to 10 inches high. This little annual makes an excellent edging plant. Packet, 50c; ¼ oz., \$2.00.

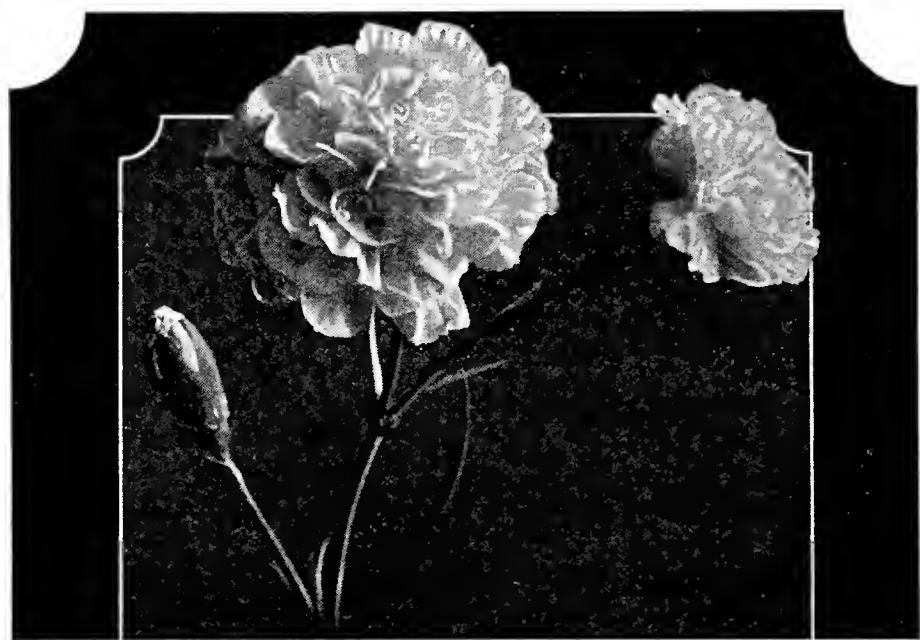

Balsam, Double Bush Flowered, Torch

CHRYSANTHEMUMS, HARDY GARDEN KOREAN HYBRIDS

These single perennial Chrysanthemums produce a lavish profusion of colorful blooms just at a time when other plants are beginning to fail. The bushy plants are hardy, easy to grow, and if sown early will bloom in the late fall of the same year as sown.

The range of colors is most impressive. Packet, \$1.50.

Marshall's All-Double Carnations

CHRYSANTHEMUM CORONARIUM SINGLE GOLDEN GLORY

Large, perfectly formed flowers, three to four inches across, of deep canary-yellow petals and disc of same color. Flowers are produced on two-foot stems on plants growing three feet high. This annual Chrysanthemum, which is very free flowering and makes an ideal cut flower, should find favor with everyone. Per packet, 25c.

MARSHALL'S ALL DOUBLE GIANT BORDER CARNATIONS

This wonderful strain of Carnation produces large double flowers 1½ to 2½ inches in diameter which stands upright on long stems, each one so strong that it easily carries its blossoms. The foliage is broad and of a dark blue-green color. The most remarkable feature is that the seed produces practically no singles and the plants are absolutely hardy.

Marshall's All Double White.

Marshall's All Double Salmon.

Marshall's All Double Rose.

Marshall's All Double Scarlet.

Marshall's All Double Dark Red.

Marshall's All Double Purple.

Marshall's All Double Mixed.

Per packet, \$1.00. Collection: 1 each, 6 colors, \$5.00.

CHEIRANTHUS ALLIONI, GOLDEN BEDDER

Gardeners throughout the country will welcome Cheiranthus Golden Bedder as an alternative to the orange form. The color is a deep golden-yellow. Its fine tone will blend more easily with many subjects than does that of Allioni.

It is a sweetly scented, long-lasting flower, especially if the seed pods are not allowed to form. Packet, 50 cents.

CORNFLOWER, JUBILEE GEM

Jubilee Gem is a dwarf variety of Cornflower making a compact plant literally covered with flowers. It has foliage distinct from all other Cornflowers, forming a tufted mass of vivid green, contrasting well with the dark but vivid double blue flowers. The plant is about 12 inches in height. Packet, 15c; ¼ oz., 75c.

COSMOS, SENSATION, PINKIE AND PURITY

The early Sensation type of Cosmos is today the favorite for cut flower use. The large flowers are carried on very long stems and are freely produced on plants 3 to 4 feet high. Pinkie is a delightful rose-pink shade and Purity a glistening white. Each color, per packet, 25c.

COTYLEDON SIMPLICIFOLIA

A gem for the rockery, with spikes of small, golden yellow bells which hang down over sedum-like foliage. This hardy perennial should be planted in a sunny situation. Grows 6 to 8 inches high and flowers in June and July. Packet, 50c.

Flower Seed Specialties—Continued.

DAHLIA, CALIFORNIA HYBRIDS

Marshall's Gold Medal Strain

Our seed is selected from the largest and finest varieties, grown and ripened under ideal conditions; there is no finer seed produced. The better the seed, the greater the opportunity to originate a new and finer Dahlia. 25 seeds, \$1.50; 50 seeds, \$3.00; 100 seeds, \$5.00.

GAILLARDIA GRANDIFLORA, GOBLIN

This dwarf Gaillardia forms 12 to 16-inch broad, arched plants, of close, compact habit. The foliage is practically covered with two-colored flowers of bright yellow with a deep red zone. Flower stalks are long enough to provide lasting cutting material from July till October. If sown in early spring, this perennial Gaillardia will flower the same year. Pkt., 50c.

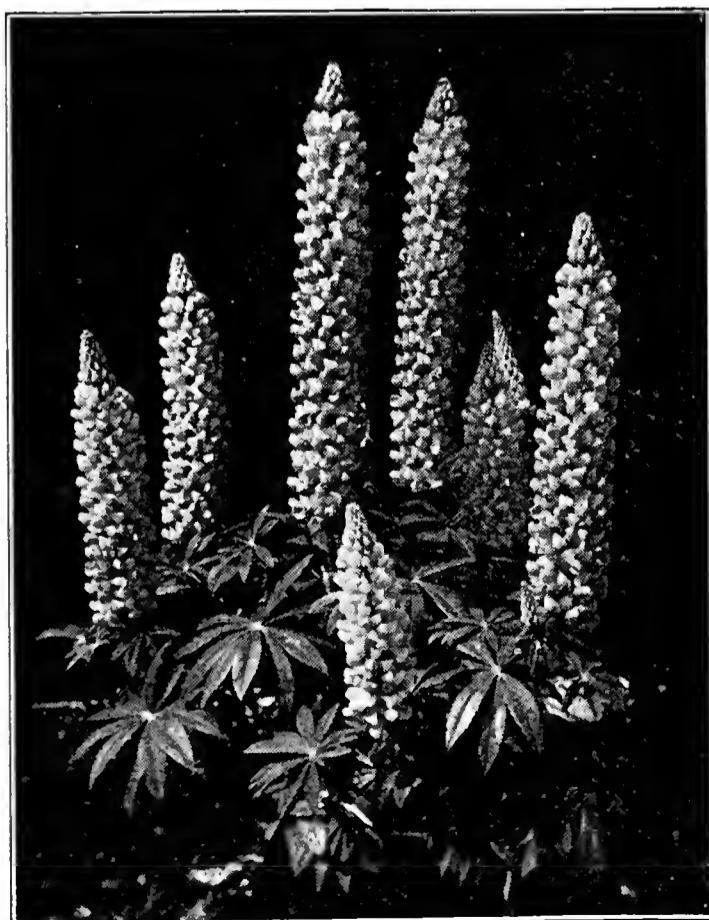

Gaillardia, Goblin

NEW RUSSELL LUPINS

At rare intervals something of really sensational character in horticulture comes along. This we have in the new Russell Lupins, a really distinctive type of *Lupinus polyphyllus*. It is distinct in the combined features of size, habit, spike formation and colors. The remarkably massive spikes of flowers, resembling a closely set, well rounded column of Sweet Peas in an indescribable range of colors, have created a sensation whenever seen. This is a real novelty and will be in great demand. Pkt., 50c; 5 pkts., \$2.00.

Plants, spring delivery, 3½-in. pots, \$1.00 each; \$10.00 dozen.

An Individual Plant of Russell Lupins

MARIGOLD, CROWN OF GOLD

An entirely new type of Marigold. The crown and the collarette of big broad petals are of a bright, clear golden orange. The flowers are slightly sweet scented and the foliage is free of the usual Marigold odor. Early flowering and very floriferous. Height 1 foot. Pkt., 25c; ¼ oz., 75c.

MARIGOLD, CHRYSANTHEMUM FLOWERED

(Incurved) Mixed

This new strain of African Marigold is identical in form of flower to a lovely incurved Chrysanthemum. The plants are very floriferous and the stems are good and strong for cutting. We feel that this novelty represents the greatest advance yet made in African Marigolds and has come to stay. Height 3 feet. Pkt., 50c; 5 pkts., \$2.00.

MARIGOLD, TOM THUMB, GOLDEN CROWN

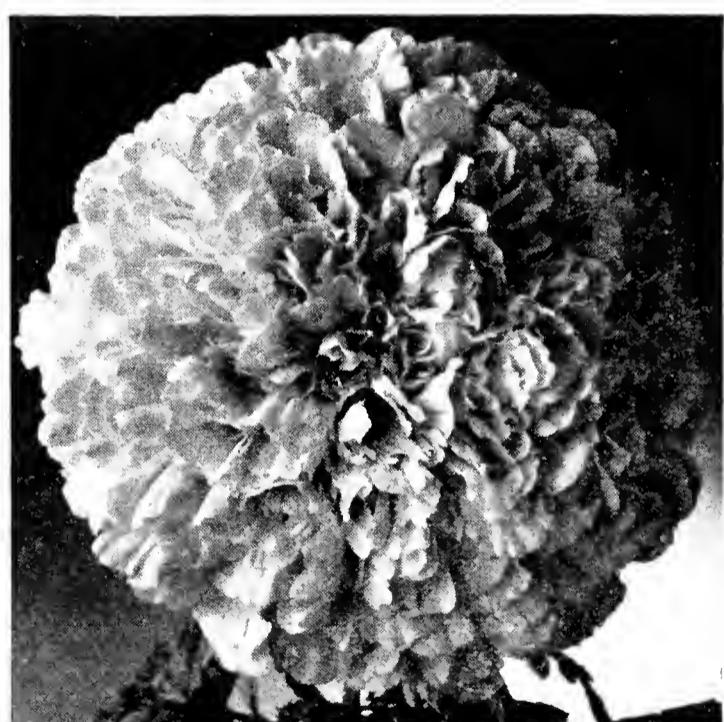

Marigolds have of late years been very largely in the public eye. The novelty we now present is a dwarf form of Guinea Gold, growing about 10 inches high, possessing all the merits of its parent. The bright golden yellow flowers, flushed with orange, larger and of the same shape and firm substance, are produced in great abundance, often to the number of 25 to 30 on a full grown plant. Being practically all double, the value of GOLDEN CROWN for the front row of a border can hardly be overrated. We may add that this novelty is quite distinct from that being offered as Collarette Crown of Gold. Pkt., 35c; 3 pkts., \$1.00.

MARIGOLD, HARMONY

This striking new variety that has already proven its worth is a remarkable break in the dwarf French section of Marigolds. The double flowers almost suggest those of a Scabious and are of a bright golden yellow, bordered with rich maroon-red. The plants are bushy and about 12 inches high. "Harmony" comes quite true from seed. Pkt., 15c; ¼ oz., 75c.

DWARF FRENCH MARIGOLD, ROYAL SCOT ALL DOUBLE

This variety of Dwarf Striped French Marigold replaces all present strains. Growth dwarf and bushy; every plant of uniform shape and height of about 10 to 12 inches. Color rich mahogany and gold in uniform stripes. Practically absolute doubleness in each plant is something quite new in French Marigolds. Pkt., 35c; ¼ oz., \$1.00.

Marigold Gigantea, Sunset Giants

MARIGOLD GIGANTEA, SUNSET GIANTS

Flowers of this variety are the largest ever known in the Marigold group and are produced in great profusion. They are loosely formed, very full centered with broad, heavy petals. Sunset Giants is a mixture comprising almost every shade of yellow from golden orange to pale primrose. The plants grow about 3½ feet high and are extremely strong growing. Pkt., 50c.

NASTURTIUM, DWARF DOUBLE GOLDEN GLOBE

The plants are truly dwarf and compact, totally without runners. They are very free flowering and the well formed double flowers of deep golden yellow are delicately sweet scented. We feel sure that this compact variety will be even more popular than the Golden Gleam. Pkt., 15c; oz., 50c.

Flower Seed Specialties—Continued.

NEMESIA, BRIGHTNESS

A dwarf bedding Nemesia with brilliant cherry-red flowers. As can be well imagined, en masse Brightness makes a very vivid display. Height 9 inches. In packets only, 35c each.

Nierembergia Hippomanica

NIEREMBERGIA HIPPOMANICA

This charming dwarf lavender-blue Nierembergia has an exceptionally long flowering period, beginning to flower 15 weeks after seed is sown and continuing until heavy frosts of late fall. Plants are definitely dwarf, not over 5 or 6 inches tall and with a spread of 8 to 10 inches. It is a half hardy perennial which will winter over if given some protection. Pkt., 50c.

PANSY, CORONATION GOLD

The flowers of this new Giant Pansy are a most pleasing shade of pure deep yellow, suffused with golden orange and without eye. The plants are free blooming but compact. Pkt., 75c; 4 pkts., \$2.50.

MARSHALL'S SUPER GIANT PANSIES

This strain of truly Giant Pansies is of most vigorous growth, the enormous flowers are carried on exceptionally long stems and have a fine range of brilliant colors. Excellent for show work or as a pot plant. \$2.00 per packet.

MARSHALL'S NEW ORNAMENTAL PEPPER

An excellent plant for Fall and Christmas decoration. It has been pronounced by growers, who have tried this Pepper for us, as far superior and more ornamental than varieties previously grown. Plants are compact, about 6 to 9 inches high, with good, deep green, heavy foliage and are literally covered with small oval fruits in shades of purple, red and white, and brilliant scarlet. 50c per packet.

PETUNIA, DWARF BEDDING, SALMON SUPREME

Light salmon color; a distinct new shade in the hybrida nana or dwarf bedding Petunias. Plants grow about 12 inches high and wide, flowering continuously until frost. Pkt., 50c; 5 pkts., \$2.00.

PETUNIA, FLAMING VELVET

One of the finest bedding Petunias. The plants are of spreading habit and are literally covered with flowers of deep, velvety crimson-red. Pkt., 50c.

RANUNCULUS MARSHALL'S SUPER HYBRIDS

We have made arrangements with a prominent New Zealand grower who has been supplying this wonderful strain of Ranunculus that has been taking the first award at the International Flower Show in New York.

Fresh seeds will arrive here in March and may then be sown in greenhouse, these plants would bloom the following Spring, a selection can then be made for bulbs with the finest flowers to be used for exhibition purposes the following season.

This is the finest strain that has been placed on the market. \$1.00 per packet; 6 packets for \$5.00.

SALVIA, NEW DWARF GEM

This new Salvia is of Tom Thumb dimensions, of compact habit, not exceeding 6 to 8 inches in height. It is as early as Harbinger, very free flowering, producing numerous spikes of flowers 4 to 5 inches long, of the most vivid scarlet color. It will certainly prove an excellent variety for bedding purposes and for borders, also a real gem for pot work. Pkt., 35c; 3 pkts., \$1.00.

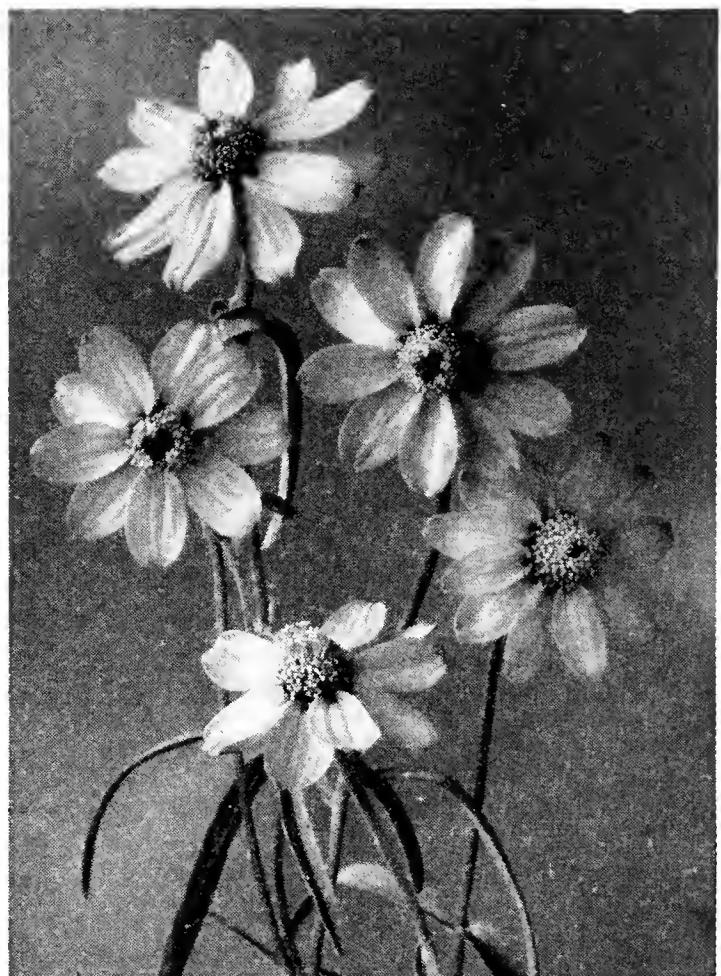

SCABIOSA GRANDIFLORA, ROSETTE

Rosette is a beautiful shade of deep rose heavily suffused with salmon, a new color in annual Scabious. This undoubtedly will be a most popular flower for cutting and for the garden. Pkt., 35c; $\frac{1}{4}$ oz., \$1.00.

TAHOKA DAISY

Machaeranthera Tanacetifolia

The Tahoka Daisy is as easily grown as any Aster and continues flowering throughout the summer and early fall. Lilac-blue flowers with bright yellow centers carried on long, slender stems and the grayish green pinnate foliage present a desirable combination as a cut flower. Grows about 20 inches high. Pkt., 35c; $\frac{1}{4}$ oz., \$1.25.

Zinnia Linearis

ZINNIA LINEARIS

The flowers of this most interesting little dwarf Zinnia are a lovely shade of golden orange with a delicate lemon-yellow stripe on each petal; the center is dark brown turning to golden orange as the plants develop. It is extremely early flowering, commencing when the plants are 6 inches tall and continuing till the late frosts of Autumn. It never looks untidy, as the dozens of newly opened flowers prevent the faded ones from becoming prominent. The plants reach a height of 8 to 10 inches and are an extremely valuable addition to the list of plants for edging or any part of the garden where a dwarf growing plant with brilliant coloring is desired. Pkt., 35c; $\frac{1}{4}$ oz., \$1.50.

ZINNIA, NAVAJO MIXED

An interesting, unique type of Zinnia. Flowers are medium sized, double and semi-double, and composed of long, narrow petals which, for about one-third of their length, are tipped with a lighter color than the balance of the flower. Colors run through lilac, lavender, russet, crimson, orange, yellow, pink and pastel shades. Bushy plants, about 1½ feet high. Pkt., 35c; $\frac{1}{4}$ oz., \$1.00.

ZINNIA FANTASY, STAR DUST

Among the great variety of new Zinnia types recently developed, the Fantasy type has received more publicity than any other. Its shaggy informality immediately recommends it for cut flower use. Furthermore, since the flowers are of medium size, they are easily handled and can be gracefully arranged in bouquets either by themselves or in combination with other flowers. Star Dust, the lovely golden yellow variety in this popular type, has the characteristic informal, shaggy-petaled, medium sized flowers, on plants 2½ to 3 feet in height, with stems of good length for cutting. Pkt., 25c; $\frac{1}{4}$ oz., \$1.00.

NEW AND DISTINCTIVE PLANTS

Fuchsia Magellanica

ANGELONIA SALICARIAEFOLIA

A most fascinating tender perennial which may be used as a pot plant, but experience has proven it to be a most desirable bedding plant. It will bloom consistently throughout the season, will endure excessive drought and, on the other hand, has withstood heavy rain storms. The plant is well branched and festooned with Gloxinia-like blossoms of purplish blue with white throats. Will bloom its best when grown in poor soil. Plants from 2½-inch pots, \$3.00 per doz.; \$25.00 per 100.

CYTISIS ANDREANUS, NEW HYBRIDS

We offer a valuable collection of these gorgeous Brooms of recent introduction. These shrubs are breath-taking in their compelling beauty. The large, pea-shaped flowers are produced on long racemes. This stock has been subjected to a severe test during the past five years and has come through the winters with little or no burning.

Arlesienne. Amber-orange overlaid with crimson.

Monterey. A warm coppery orange.

Rosenante. Veined satiny cream overlaid with heavy markings of mahogany.

3½-inch Pot Plants—\$1.25 each, 3 for \$3.00.

DAPHNE ODORA

A hardy form producing broad glossy leaves on dense shrubs, 18 to 24 inches high, which resemble dwarf Rhododendrons. The flowers are creamy pink and are delightfully fragrant.

3½-inch Pot Plants—\$1.25 each; 3 for \$3.00.

FUCHSIA MAGELLANICA

This interesting shrub came from the New York Botanic Garden where it has proven entirely hardy. The ruby-red flowers are most abundantly produced either in full sun or partial shade.

2¼-inch Pot Plants—\$4.50 for 10; \$35.00 per 100.

HEMEROCALLIS HYPERION

(See illustration inside back cover)

Hyperion is a cross between Hemerocallis Sir. M. Foster and Florham. The color is English primrose-yellow. Flowers are produced in great numbers on stout stems about 40 inches tall in July and early August. \$1.25 each; \$12.50 per doz.

PHLOX AUGUSTA

(See illustration inside front cover)

(Plant Patent No. 252). A strong growing variety of medium height (2½ feet). Color a brilliant cherry-red, intense and sparkling; it does not discolor or bleach in the sun. Rich bronze-green foliage and stem. \$4.50 for 10; \$35.00 per 100.

MARSHALL'S NAMED DOUBLE PYRETHRUMS

Brilliant. Large double flowers of glowing red; 2½ feet.

Buckeye. Double flowers of crushed raspberry color.

Miami Queen. Delicate shade of pink with flowers of magnificent texture.

Queen Mary. Soft, silvery pink.

Strong Plants—3 for \$2.00; 10 for \$6.00.

ROSE R.M.S. QUEEN MARY

(Plant Patent No. 249). The color of this beautiful variety is quite distinct from anything yet seen in Roses, a wonderful combination of vivid shades—a rich, glowing blending of salmon and pink with an orange base. The buds are long and pointed, the flowers are of large size and beautiful form. They are full enough for all purposes, freely produced and delicately perfumed. The plant is of good straggling habit. A truly magnificent Rose.

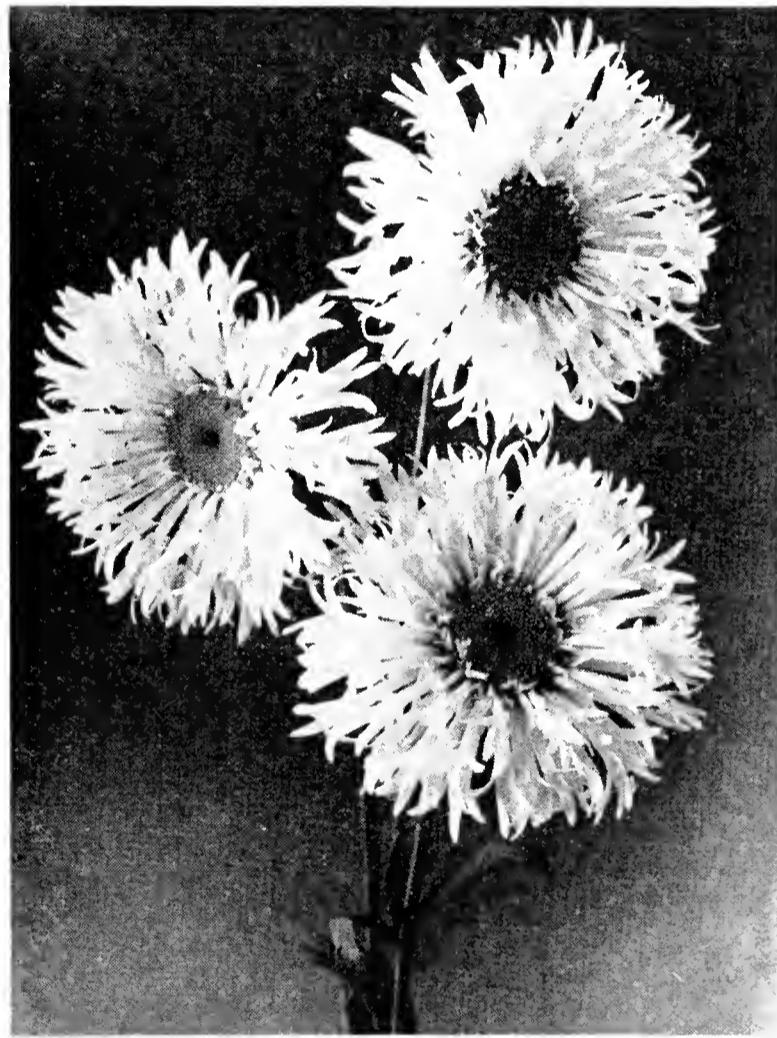

Potted Plants—\$2.25 each; \$20.00 per doz.

Grafted Plants

2½ inch pots.....	\$50.00 per 100
3 inch pots.....	60.00 per 100
4 inch pots.....	70.00 per 100

SHASTA DAISY—CHIFFON

A daintily frilled Shasta Daisy which grows about 18 inches tall. The flowers are formed by a double row of petals frilled and flared at the edges. The center is a clear yellow. The flower is about 3 inches across. 3 for \$1.50; \$5.50 per doz.

Shasta Daisy—Chiffon

Marshall's Matchless Flower Seeds

ALL FLOWER SEEDS ARE MAILED FREE

The following list contains a most complete assortment of the choicest and most popular flowers for either conservatory, greenhouse or garden culture.

Annuals grow from seed, flower, mature their seed, and die in one year, or, in other words, the same season.

Hardy Annuals are those which can be sown in the open ground.

Half-Hardy Annuals are those which should be started early in the house, conservatory or hotbed, and transplanted to the garden in settled warm weather.

Biennials grow from seed, sown from June to August, ripen their seed and die the next year, though some varieties bloom the same season if sown early in gentle heat.

Hardy Biennials will winter in the open ground without protection.

Half-Hardy Biennials require the protection of a cold frame or cool house during Winter.

Perennials grow from seed, and continue flowering annually for many years after the first season. Some varieties flower the first season if planted early in gentle heat.

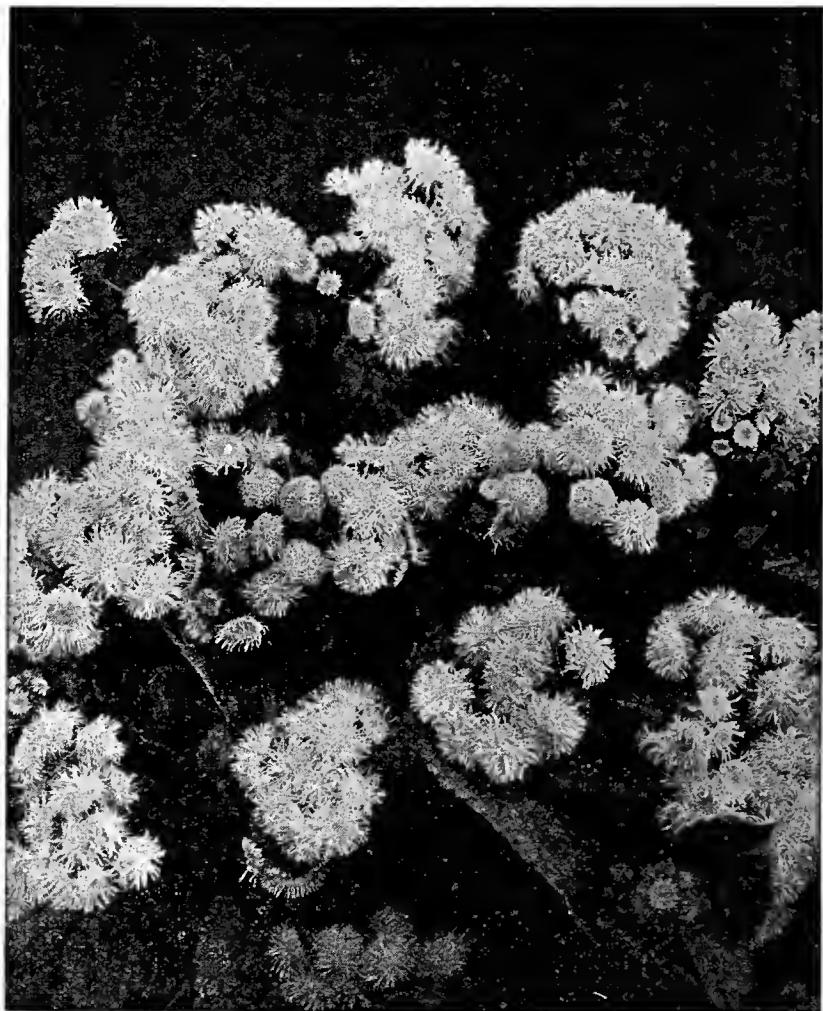

Hardy Perennials can remain in the open ground during Winter without protection.

Half-Hardy Perennials require the protection of a cold frame or cool house during the Winter.

Tender or Greenhouse Perennials require window or greenhouse culture, free from frost during Winter and thrive in the garden during the warm months.

WILD GARDEN FLOWER SEEDS

This mixture contains over 100 varieties of the oddest and choicest annuals imaginable. For naturalizing purposes or sowing broadcast, nothing approaches wild garden flower seeds for effect and cheapness. No care is necessary, and a never-ending succession of bloom and fragrance can be obtained throughout the entire summer and fall. Pkt. 10c, oz. 25c, 1/4 lb. 75c.

Marshall's Spencer Sweet Peas

Sow as soon as the ground can be worked in the Spring in trenches at least 6 inches in depth, then as the plants grow fill in the soil about one inch at a time until the trenches are full, taking care not to cover the young plants. Liquid manure applied occasionally will be found very beneficial.

Keep well watered during dry periods and spray periodically to prevent injury from green fly or aphids.

In view of the numerous Sweet Pea introductions this list has been again revised and includes those varieties which trials have proved to be the best in the various colors.

Marshall's Early Flowering Spencer Sweet Peas

The Early Flowering Spencers bloom about two weeks earlier than the late flowering varieties when grown under congenial conditions. The flowers are beautifully waved and produced on long stems, four flowers predominating on each stem. For winter flowering under glass or in the southern states they far surpass the Late Spencers. When grown in the open ground they will usually bloom in about 100 days after planting.

POLE, OR RUNNING BEANS

Sow from the 1st of May (for all except Limas) to the latter part of May, in hills 4 feet each way. Limas should not be planted until warm weather has fairly set in. One quart of Limas will plant about 100 hills, allowing four or five beans to a hill, and of the smaller sorts about 200 hills. Poles 8 to 10 feet long should be firmly set in the hills before planting seed. Set poles 4 feet apart each way, and plant 4 to 6 beans about 1 inch deep around each pole. Thin out to three plants to a pole if the soil is rich; pinch off the ends of plants when they overrun the top of the poles, to effect more perfect growth below.

CUCUMBERS

One ounce to 60 hills, 2 to 3 pounds to one acre.

For very early use seed may be started in heat and the plants set out in May. Pieces of inverted sod are an excellent medium for starting and growing early Cucumber plants as they can readily be lifted from the hotbed to the garden without disturbing the young plants growing upon them. For main crop plant in hills 4 feet apart at the end of May. Keep the young plants safe from the striped bug dusting with dry plaster or powdered Hellebare. Leave four strong plants to each hill.

Italian, Cichoria Catalogna. The leaves are more upright than the Dandelion. Pkt. 15c, oz. 60c.

EGGPLANT

One ounce will produce about 2000 plants.

The Eggplant will thrive well in good garden soil. The seed should be sown in hotbed or warm greenhouse in March or April, and when about an inch high put in 2-inch pots. Plant about June 1st, 2 1/2 feet apart. If no hotbed is at hand they can be grown in any light room where the temperature will average 75 degrees.

KOHL-RABI

One ounce will sow 300 feet of row.

This delicious vegetable should be in every vegetable garden. It forms a bulb at the base of the stem above the ground. Successive sowings should be made throughout the season and good cultivation is necessary. Use the bulbs of Kohl-rabi when they are about the size of an apple as they become hard and stringy if grown too long.

Lettuce

One ounce will sow 200 feet of drill.

Sow in the open ground as early as possible, barely covering the seed. If the hotbed is used let it be started quite early. Give but little heat and plenty of water and air on fine days. Let plants in the beds be about 4 inches apart. As they increase in size thin them out or they will become weak. Plant for late use in a cool, partially shaded place in rich soil.

MUSHROOM SPAWN

Ten pounds will spawn about 10 feet square.

Mushroom beds may be made in a warm, dry cellar, or in any building where the frost does not penetrate and in the open air during the summer and fall months. Having procured the spawn, the next thing to be attended to is to make preparation for the beds. About two or three weeks before the beds are to be made collect a quantity of fresh horse manure without the straw; place it in a heap under cover, and as it heats keep turning it over once or twice a week, until the fiery heat has become exhausted, which will require from ten to fourteen days' time. When the manure is in a condition to be made up lay out your bed, according to your requirements, say 3 feet wide, 10 feet long and from 2 to 3 feet deep; beat it down well with the back of the spade as the process of building goes on. When the bed has been made some time, say a week or thereabouts, and the heat sufficiently declined to a temperature of 65 or 75 degrees, the spawn may be put into it. Break the spawn in pieces 2 inches square, and put them 6 inches apart, all over the bed; then cover the bed with 2 inches of rich soil. If everything goes well, you may expect Mushrooms in about five or six weeks. When the soil looks dry give a gentle watering with tepid water, using a rose on the watering pot. Good crops of Mushrooms can be obtained by spawning the hotbeds in spring.

Pure Culture Prolific Direct Bricks. An American-made spawn which produces large crops of large size, deep cream and excellent quality Mushrooms. Per brick 45c, 10 bricks for \$3.50, 50 bricks \$15.00.

Bottle Spawn. This spawn is very perishable and can only be kept in cold storage. Orders filled from the factory. One quart will spawn 50 sq. ft. Per quart bottle \$1.25, 12 quarts for \$12.00.

POTATOES

GROWN EXPRESSLY FOR SEED IN MAINE OR PRINCE EDWARD ISLAND

Peck will plant 100 foot row. Ten bushels cut tubers will plant 1 acre.

The Potato can be grown with varying success on soils of all kinds and in all conditions of fertility, but the soil best suited to it is a sandy loam. Manure is applied either in rows or hills or broadcast over the hills and ploughed in. In highly enriched soils the plants are more liable to disease than when grown in soil that is naturally good. Plant as early in spring as the ground can be had in fair working order, in hills or ridges, about 3 feet apart, cover lightly with soil about 4 inches deep.

Beauty of Hebron. Slightly flesh colored skin with pure white flesh; very productive and of the finest quality.

Bovee. Extra early; fine quality; flesh white.

Dibble's Russet. This is the best main crop Potato in cultivation. The tubers are round to oblong in shape, of good size, with white flesh and covered with russet skin. The quality when cooked cannot be excelled. It also has great disease-resistant and blight-proof properties.

Early Rose or Spaulding Rose. Very early; fine quality; very productive, skin shaded rose color.

Green Mountain. Oval shape; white skin and flesh; heavy yielder and good for winter use.

Irish Cobbler. One of the best extra early varieties.

At the time of going to press with this catalogue the Potato market is so unsettled that prices are subject to change.

Any of the above varieties. Bu. \$3.00, bag of 150 lbs. \$6.50.

Certified Stock of Green Mountain and Irish Cobbler. Bu. \$3.25, bag of 150 lbs. \$7.00.

Potatoes are forwarded by express or freight as directed, purchaser paying charges.

GLORIOSA SUPERBA

This handsome African tuberous rooted plant known as the Climbing Lily has been used formerly as a greenhouse climber but, after repeated tests, we find that it may be enjoyed by the amateur as a most attractive climber. They may be grown on a trellis as they find support through numerous tendrils. Grows 6 to 8 feet in height and produces numerous flower stems 12 inches in length with large reflexed lily-like flowers, opening yellow but changing to orange-red and deep scarlet. The tubers should be planted in a warm sunny situation or to insure early growth they may be started inside. In fall the tubers should be lifted and placed in dry sand in a warm cellar for the winter. 75c each, 3 for \$2.00, \$7.50 per doz.

MONTBRETIAS

Hardy summer-flowering bulbous plants which should be planted in the early spring and will flower in September. Bulbs may be left in borders during Winter, if well covered, and will flower earlier than spring-planted stock.

NEW GIANT FLOWERING HYBRIDS

These magnificent new Montbretias have erect flowers measuring 4 inches across, borne on stems 4 feet in height.

ENGLISH CHARM DAHLIAS

Miniature Dahlias of Peony-flowered Type

The newest type from Europe. They form bushy plants, 2 1/2 to 3 1/2 feet in height and are literally covered with flowers all season. The medium sized, semi-double blooms are carried on rigid, wire-like stems well above the foliage, making ideal garden plants. As cut flowers they are superb, keeping fresh in water for many days.

HARDY LILY SEEDS

Raising lilies from seed is recommended to insure healthy and vigorous stock and it has been proven that seed saved from lilies even when the parent plants have shown signs of disease has produced perfectly healthy bulbs.

In the open ground seed may be sown in late fall as hard freezing does not injure the seed, in fact, it may aid germination in spring. Sowing in spring is also a suitable time as in many cases strong enough plants may have developed by fall to withstand the winter with a mulching of leaf mould or litter. The approved place is a raised bed in a partially shaded situation. Sow the seed to a depth of one inch and water the bed frequently in dry weather.

The Creelman Lily

(*Principes* Hybrid)

The well-known Creelman Lily originated a few years ago, the result of a cross between *L. Regale* and *L. Sargentiae*. Previous to this event several crosses had been made using the same parentage and were classified as *L. Principes*. The Creelman Lily is undoubtedly superior to the others in stamina and size of flowers. It may be called a glorified *L. Regale* coming into bloom about two weeks later.

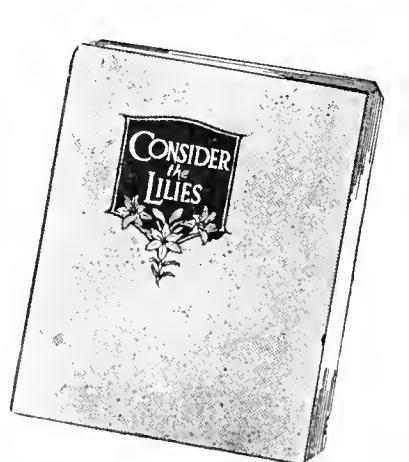

We do not claim that the bulbs we offer are the true Creelman Lily, but they are seedlings of the true parent and their blooms have shown remarkable form. Bulbs measuring 4 to 6 inches in diameter \$1.50 each; \$15.00 per dozen.

"Consider the Lilies"

In presenting this treatise, Mr. W. E. Marshall, the author, was prompted by a desire to assist the amateur but his wishes have gone beyond his expectations as his brochure is now recognized by experts as a text book on this interesting genus.

Over one hundred varieties are described, with complete history and cultural directions. A most interesting book to read, illuminated with 67 magnificent colored plates.

There is only a limited supply of this book which will be sent postpaid for \$2.00. It also may be procured free with a cash purchase of Lily bulbs amounting to ten dollars.

Lilium Maxwell

The Prize-Winning Lily

Over two years ago we placed this wonderful new Lily before the public. After giving it a fair trial we had been convinced that it is one of the finest hybrid lilies of recent introduction. In fact since its introduction, this lily has not only maintained its reputation but has considerably enhanced it. In two or three years five and even six giant stems have been known to spring from one bulb originally planted. It is the only lily to receive the Cory Cup of The Royal Horticultural Society, for the best plant introduced in any one year, this award being only given to a plant of really outstanding merit.

Lilium Maxwell is a cross between *L. Maximowiczi* and *L. Willmottiae*, combining the free flowering qualities of the latter with the sturdiness and grace of the former parent. The color is a striking bright red, the stamens being orange-red. The numerous reflexed flowers have the habit of looking one straight in the face. Height 6 feet. Blooms late July.

PRICE: Strong flowering bulbs, \$1.25 each; 3 for \$3.50; \$12.00 per dozen.

Lilium Philippinense Formosanum

(*Lilium Formosanum*)

We believe this to be one of the most satisfactory of all hardy white lilies. There are various types of this species, some being quite dwarf in habit and blooming in mid-summer. From the original tall, late flowering variety, discovered by E. H. Wilson in the island of Formosa, we have selected a very fine, pure white strain which we now offer.

The long grass-like foliage extends almost to the long tubular shaped flowers. The fragrance is quite pleasing. Early spring planting is also quite satisfactory.

PRICE: Bulbs measuring 6 inches in diameter, 50c each; 3 for \$1.35; \$5.00 per doz.; \$38.00 per 100.

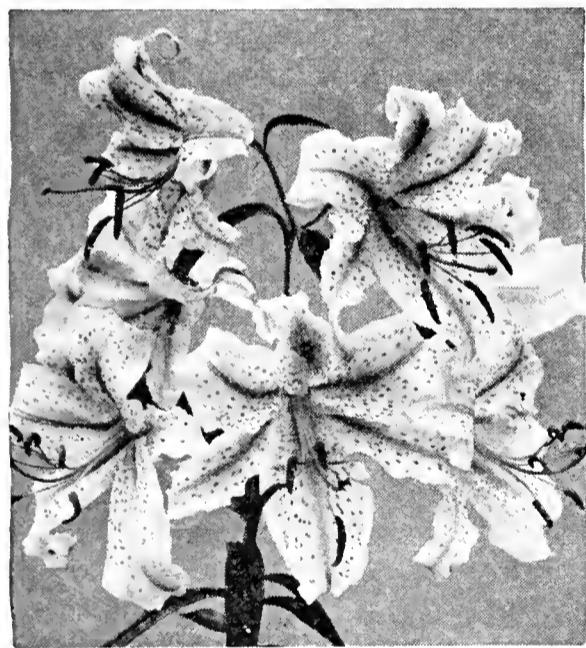

HARDY GARDEN LILIES

The herbaceous border is the ideal place in your garden for hardy Lilies. A few bulbs dotted here and there, where the close companionship and friendly shade of neighboring plants help their growth, they eventually become great colorful colonies, enhancing the entire beauty of the border with their graceful, dignified, and majestic heads.

If bulbs are planted just as soon as the ground is in condition in spring, one may expect excellent results the first season. We are in position to supply dormant bulbs as early as required. Order early and look for good results.

WATER LILIES

We are pleased to announce that we are again in a position to offer large plants of water lilies. These large plants insure a longer blooming period, many of them bearing developed flower buds when shipped. We stress the fact that these are large roots and are packed and shipped in sphagnum moss.

TROPICAL DAY BLOOMING WATER LILIES

Garden lovers are fast becoming acquainted with the superiority of the Tropical Water Lily over the old time Hardy Water Lily. The fragrant tropical blooms, with their great variety in color and shade, are larger and much more numerous than any of the Hardy varieties. Their long stiff stems not only add to their beauty in the pool, but make excellent cut flowers.

Herbaceous Perennials and Rock Garden Plants

Perennials, never more popular than today, comprise most of the best flowers and make a foundation for any garden. They exist in infinite variety and provide a succession of flowers in every conceivable hue from early Spring to late Fall and range in size from the tiniest edging material to the tall plants suitable for a background.

For the best effect it is essential to plant in groups. We are therefore continuing to offer perennials in quantities of not less than three of one variety as satisfactory results cannot be obtained by using one of a kind.

Varieties marked (*) are suitable for rock gardens.

Hybrid Tea or Everblooming Roses

Suggestions for Spring Planting of Roses

The soil should be thoroughly cultivated and a liberal supply of rotted manure added. In planting, dig a hole sufficiently large to accommodate the roots when spread out on the bottom of the hole. In filling in the soil, shake the plant lightly in order that the soil may mix between the roots. Fill in the soil and firm it in order that the plant may be solid. Be sure to see that the lower parts of the lower branches are below the surface of the soil. Do not plant in a mound, the surface should be level. Cut back the branches to within 4 to 6 inches of the surface of the ground. With this treatment the best results may be obtained.
